

Project: Logo
Employer: AppCodex
Year: 2009

AppCodex is a company I founded with my younger brother. Generally, for clients, I was responsible for UI/UX design, he did coding. We both tested and improved everything until we were satisfied.

concept & design by Ralph Reijs

INGRESS BOOTCAMP

The Unofficial Guide to Level 8

Project: Logo
Employer: Ingress Bootcamp
Year: 2013

This is a manual for gameplay that I decided to write in absence of an official one and it eventually became 150+ pages long/

Fun Fact: It was translated by 400+ (other) volunteers into 40+ languages.

design by Ralph Reijns

Project: Logo
Employer: InstaTunnel
Year: 2013

A startup that was offering a prepaid, anonymous VPN service. Prepaid credit was to be sold at hotels, airports, supermarkets, etc.
Fun Fact: There was absolutely 0% logging on the server side, which made it difficult to keep track of used bandwidth.

Project: Logo
Employer: Resistance Netherlands
Year: 2013

In the early days, RES NL needed a website and a logo.
I started tinkering and this was the result.
Fun Fact: It has since been printed on thousands of
shirts, hoodies, flags, and other merchandise.
design by Ralph Reijs

Project: Anomaly Logo for Persepolis Utrecht
Employer: Resistance Netherlands
Year: 2015

design by Ralph Reijns

RES symbol is a copyright of Niantic Labs @ Google

Cryptochip

Fly, Play, Invest.

Project: Logo & Pitch design
Employer: CryptoChip
Year: 2017

I was volunteering for people on LinkedIn that asked for help with their Startups, and this was one: a blockchain startup aiming at the Poker industry.

I designed the logo and Pitch Deck presentation for the founders.

Stay up to date.
With custom Alerts.

All the markets,
All the currencies.

Buy, Sell and Send safely
via your online wallets.

The current Bitcoin
Blockchain statistics.

Mining Statistics and
Profit Calculator

Project: iBitcoin
Employer: AppCodex
Year: 2010

After reading the Bitcoin whitepaper in 2009, I started mining. Out of my own need for updated mining info on the go, I developed iBitcoin, an application for iPhone with integrated mining pool stats. It was the first of its kind on the AppStore in 2010.

concept & design by Ralph Reijs

Project: iDomotics
Employer: AppCodex
Year: 2010

I started getting into home-automation in 2010 and decided to write an iPhone app that could communicate with my HA-router to remotely control lights / temperature.

concept & design by Ralph Reijs

Project: iPhone Application
Employer: SuitSupply
Year: 2010

A concept iPhone application that had similar functionality as the SuitSupply website. I was responsible for UI/UX design.

design by Ralph Reijs

Project: AstroWeather
Employer: AppCodex
Year: 2011

A concept for a (partially developed) app I had in mind in 2011.
Also this was born out of a personal need and lack of apps that
could deliver the desired information (in a beautiful UI/UX).

concept & design by Ralph Reijs

De **HAARLEM** App voor iPhone

Project: Haarlem App for iOS
Employer: AppCodex
Year: 2011

Conceptual design of an app that provides relevant information and news to residents and visitors of Haarlem, Netherlands.

concept & design by Ralph Reijs

Project: iPhone App
Employer: Hosting On Demand
Year: 2011

Project delivered for a Hosting Provider that wanted to offer new and existing users a way to register domains and related services via an iPhone and iPad app.

design by Ralph Reijs

JetSupport for iPhone

Project: iPhone App
Employer: JetSupport
Year: 2011

JetSupport is a company that maintains private jets, and wanted an iPhone app that help their customers in case they had special requests upon landing, etc.

design by Ralph Reijs

Leesplankje

voor iPhone en iPad

APPCODEX  Noordhoff Uitgevers

Project: Leesplankje
Employer: Noordhoff Uitgevers BV
Year: 2011

Design and development of a children's game based on the old Dutch wooden "Leesplankje" reading board.

There were 5000 downloads in first month and it was then acquired by Noordhoff Publishers Groep.

concept, design and development by Ralph Reijs

Project: Android UI Makeover
Employer: Ingress Portal Submission Tracker
Year: 2014

A mobile design for an app that was great but could be better. Unfortunately the concept was never realized.

design by Ralph Reijs

www.ziedesterren.nl

Project: Poster
Employer: Sterrenwacht Schothorst
Year: 2009

Poster design for a public stargazing event organised by a local observatory / astronomy club in Amersfoort, NL.

design by Ralph Reijs

Project: Prepaid Card
Employer: InstaTunnel
Year: 2013

A startup that was offering a prepaid, anonymous VPN service. Prepaid credit was to be sold at hotels, airports, supermarkets, etc. **Fun Fact:** There was absolutely 0% logging on the server side, which made it difficult to keep track of used bandwidth.

INGRESS BOOTCAMP

The Unofficial Guide to Level 8

This eBook was written by a fan of Ingress,
and is not endorsed by Google / Niantic.

Copyrights and trademarks remain
property of their rightful owners

Free eBook

This eBook was written to help new Ingress players understand the game quicker and better, and to teach the experienced players some new street-tricks as well.

This eBook is free (as in “free beer”) but costs a lot of time to write and keep updated. Every page needs screenshots and explanations, design and annotations.

If you read it and find it useful, spread the word! And please consider donating!

[Download](#)[Donate](#)

eBook Version: v1.5

Based on: Ingress v1.52.1

Page Count: 126

Size: 42 Mb

Downloads: 850000+

01/06/14 v1.5.0: Update to Ingress v1.52.1

01/06/14 v1.5.0: Added Levels 9-16

01/06/14 v1.5.0: Added Glyph Hacking

01/06/14 v1.5.0: Added Regional Cell Scoring

01/06/14 v1.5.0: Added Capsules

15/12/13 v1.4.0: Update to Ingress v1.41.0

13/10/13 v1.2.0: Update to Ingress v1.37.2

13/10/13 v1.2.0: Added Achievements / Medals

13/10/13 v1.2.0: Added UltraStrikes

Project: Backlink Assassin
Employer: Undisclosed
Year: 2016-2017

Design and development of a system that detects cheating in Google PageRank, based on backlink forensics between websites / domains. It was highly accurate and better than Google's own detection: all reports sent to Google resulted in the combined deindexing of 100.000s of paid links.
 concept, design and development by Ralph Reijns

The screenshot shows the Seeder web application interface. The top navigation bar includes a logo, the title "Seeder", and a subtitle "Seed the jumps for this Campaign". Below the navigation are four buttons: "ReSeed", "Graph", "Export CSV", and "Proceed to Tumbler". A sidebar on the left lists various network and campaign management options. The main content area displays "Campaign Info" for a specific campaign, showing details like transaction count (4000), base wallets (1000), and total cost (40 ETH). It also includes a "COST ESTIMATION" table and an "OUTPUT LOG" section.
