EXPERIENCE

Chief Technology Officer   02/2018 - Present

Jinbi Token   https://jinbitoken.io   London, UK

Blockchain & Security Advisor and Core ICO Team member. Delivered the infrastructure solution and provided solutions for all technical challenges.

Key Accomplishments:
- Led company through early-stages and ICO acting as **de facto ICO Manager**
- Raised **$47.5 Million** from investors
- Secured funds and infrastructure from 24/7 hacking & phishing attacks during/after ICO
- Took position of CTO

Head of Product   12/2018 - Present

Stealth Startup   Amsterdam, NL

Created an Automated Ethereum platform for spreading, tumbling, mixing, artificial trade volume and cross-blockchain conversion of ETH + ERC20.

Key Accomplishments:
- Successfully **used on Main Net** with **$150 Million worth** of ERC20 tokens
- Provided solutions in UI / UX Design, Architecture Design, Full Stack development.
- Campaigns are fully autonomous, with auto-healing for failed transactions

Head of IT Security   04/2017 - 07/2019

Pillar Project   https://pillarproject.io   London, UK

After having built and joined 25+ startups, I played a crucial role in realising the funding and setting up of a conceptual opensource product that helps take back control over personal data through cryptography and Identity Management on the Ethereum blockchain.

Key Accomplishments:
- **Raised $27 Million** from investors (**$200M value at ATH**) in a 60h Token Sale
- Secured funds and infrastructure from 24/7 hacking & phishing attacks during/after ICO
- Co-created the London HeadQuarters
- Communicated transparently with **15k investors**

Chief Technology Officer   01/2007 - 01/2014

AppCodex   https://appcodex.com   Amsterdam, NL

Delivered innovative mobile apps & games as solutions to modern challenges, and to replace archaic legacy approaches and connect the offline to the online, by making use of cutting edge technology with intuitive, user-friendly frontend interfaces.

Key Accomplishments:
- Transformed an old teaching method for reading, from old wooden board to intuitive iOS app which achieved **10k downloads** in the first month and was acquired by Noordhoff Uitgevers Groep (Netherlands largest educational publisher)
- Released the **first iOS App ever** to offer **Bitcoin** exchange functionality **in 2010**. It intuitively provided market prices, mining and network statistics/charts, a profit calculator and offered exchange functionality (orders + trades). Achieved **50k downloads** in first 2 months.

Senior Solution Architect   01/1997 - 03/2017

Freelance Contractor   EU, USA, ME

Provided cost-reducing solutions in IT Service Management to clients in Finance-, Pharmaceutical-, Petrochemical- and Information Technology sectors.

Key Accomplishments:
- **20+ years** of transforming **40+ clients**' functional requirements into functional- / technical designs and implementing solutions through enterprise Software Development Life Cycle processes.
- Optimised business processes / procedures and **drastically reduced workload and cost** of Service Delivery by applying ITIL best practices.
- Used **data-driven decisions** to develop strategies that **boosted Customer Satisfaction**
- Implemented **revolutionary interfaces** between enterprise software products to allow real-time communication on incident resolution between vendors and clients.
- Clients include: **IBM**, WorldCom, **Deutsche Bank**, Frankfurt Stock Exchange, **Bayer**, **Rabobank**, Thales, **Shell** and Roche.
